

Bevel Mirror

VOYAGER

“Enhanced by the bevels!”

Designed to enhance the glass, the Bevel mirror was born from the study of bronzed glass mirror processing. The soft shape is enhanced by the bevels, which at times are interrupted, bringing out its curves. The play of reflections and curvilinear shapes characterize the elegant figure. It is available in square or rectangular sizes and in two colour variations. The rectangular model can be placed both vertically and horizontally.

Design by: Roccadadria

Colours: Bronze and Grey Mirror

Variations:

The Bevel Mirror is available in both Square and Rectangular.
