

Daytona Side Table By Calligaris

VOYAGER

Metal coffee table available in two different heights and made from 15x15 mm square tubing with a ø 16mm circular base. Wood or ceramic table surface embedded in a rectangular outer rim. Two heights and two finishes available for the structure and three for the tops - two opposite shapes: a square and a circle. This sums up the modern design of these Daytona coffee tables. A timeless aesthetic which can be customised and is bound to take centre stage in any setting with its pared-back restrained beauty.
