

## Herringbone Dining Table

**VOYAGER**

**"17th Century style oak pedestal table features a beautiful Herringbone pattern and gorgeous stretcher base. Enquire in store for available sizes and pricing."**

Faithful to original 17<sup>th</sup> century antique designs, this table is a perfect feature for a classic or eclectic interior. Each table has been hand-crafted using traditional carpentry methods.

Made with a solid Russian oak frame this table has a deep mellow feel and beautiful aged appearance through the application of manual fatiguing. The classic Herringbone pattern is used with the oak for the table top, which has an inlaid border and generous solid oak frame. The base features a carved square baluster, with simplified bracket feet, and a chamfered stretcher rail between.

The finishing has a 15 step process of polishing to give the appearance of a lifetime of use and a varnish top coat for added protection of the wood surface.

Note: this is a large and heavy item requiring consideration for delivery access. If you have any concerns about access, please ask our helpful staff about a delivery access check.
