

Omnia Extension Dining Table By Calligaris

VOYAGER

“Sleek design with an elegant extension mechanism that is hidden from the eye!”

The Omnia extension dining table contains an ingenious mechanism able to expand the top surface. Pull the frame towards you so that the two legs with hidden castors slide on one side allowing the leaf to be pulled out. With a simple rotation the leaf fitted on metal tracks comes out of its housing and lines up with the top. The perimeter legs have a slanting cut in the inside part, a distinctive detail in the aesthetics. The top is available in a choice of ceramic or wood and the frame has a selection of wood finishes to choose from.

Omnia is available in the following sizes:
