

Orbital By Calligaris

VOYAGER

“When Italian furniture design and the masters of Ferrari engineering collide...the result is Orbital.”

New ceramic stone finish released at Milan 2015

The *Orbital* extending table combines cutting-edge design and technology: designed by Pininfarina in collaboration with the Calligaris technical team who invented the ingenious opening mechanism.

The coated rigid polyurethane column provides high stability while the dramatic aperture in the middle gives this table a streamlined look. When extended it can seat up to ten. Eye-catching Orbital will take centre stage in the dining area.
