

Polse By Calligaris

VOYAGER

“Soft and thin lines that envelop and protect but at the same time stretch and expand to create a wider dimension of relaxation.”

The Polse lounge chair has a swivel metal base and features an electrical mechanism that makes the backrest and the footrest move thanks to hidden buttons between the seat and the armrest, until reaching the lying position. An armchair designed to support the body weight and at the same time provide maximum comfort.

Lead time: Approximately 20-24 weeks from Italy
