

Seashell Dining Table By Calligaris

VOYAGER

“An ordinary everyday object has been transformed into a simple yet spectacular sculpture.”

The challenge posed by the Seashell table was to use a new material for the base: cement.

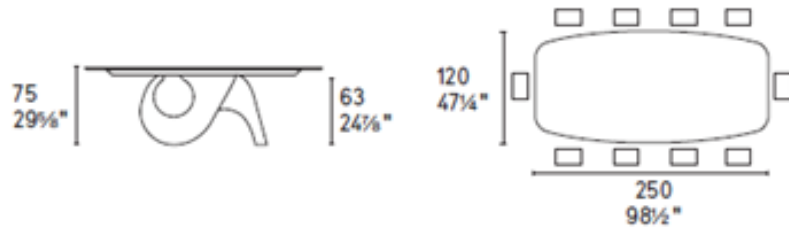

People often associate cement with “heaviness and solidity” both visually and physically, but we have re-imagined it to make it lighter and sturdy at the same time. We went for a soft sleek shape that takes its cues from the organic forms of nature, especially that of a shell with all its curves, ridges and furrows, whose structural solidity is belied by the incredibly fragility of the material it is made from.

Thus, cement takes on a new aesthetic and functional meaning; the central base is an ideal solution and changes appearance according to the position you are
